FLIGHT DENTAL SYSTEMS

VisionCure

Curing Light and Caries Detector

LOW TEMPERATURE MODE, VARIABLE LIGHTING OUTPUT

- Output light intensity: 600/1300 mw/cm^2
- Output wavelength: 385nm-515nm
- Curing time: 5s/10s/15s/20s

STANDARD MODE, SUITABLE FOR MULTIPLE DENTAL TREATMENT SCENARIOS

- Output light intensity: 1200mw/cm^2
- Output wavelength: 385mm-515mm
- Curing time: 5s/10s /15s/20s

FAST MODE, LIGHT INTENSITY, FASTER AND FULL CURING

- Output light Intensity: 2500mw/cm^2
- Output wavelength: 385nm-515nm
- Curing time: 1s/3s

CARIES MODE

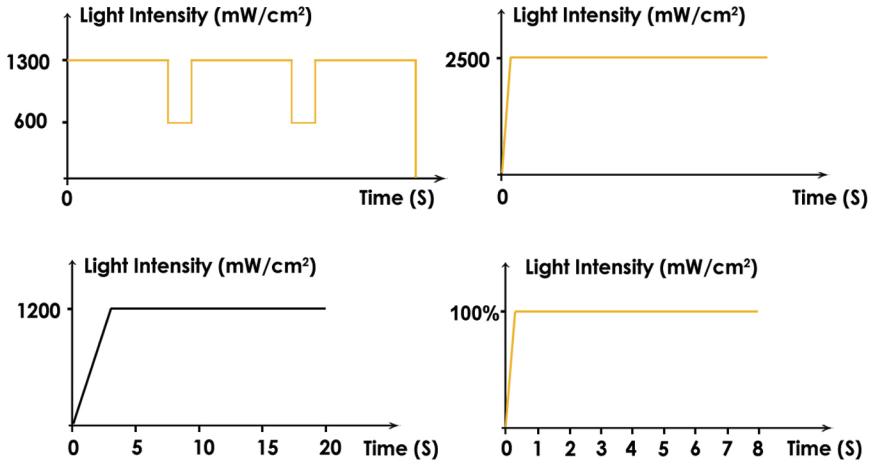

- Outputs a single purple light
- With a special light shield, caries will appear orange-red
- Working time: 60s

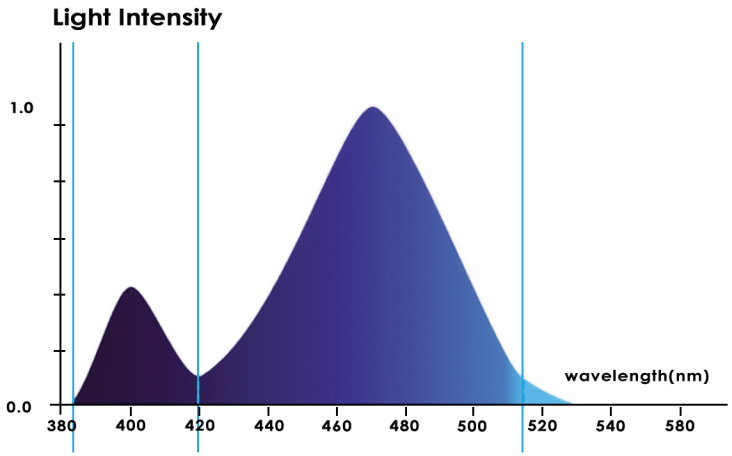

Efficient Curing, time saving and fast

Dimension:	235*81*68mm
Weight:	79.2g(excluding Base)
LED Source:	LED Light | Power:10W
Li-ion battery:	3.7V 1400mAh
Wavelength Range:	385~515nm
Peak Wavelength:	460nm
385nm~515nm(blue light) Irradiance in the wavelength range:	≤2500mW/cm²
Optical Diameter:	Ø10mm

385nm-515nm wavelength coverage, ultra-high light intensity (2500mW/cm²), It can curing most resins on the market, excellent curing effect
